

QUALITY IS OUR STRENGTH

THE 11 KG PROPELLANT GAS CYLINDER HAS THE FOLLOWING PROPERTIES:

- » **Equipment:** Plastic collar and two-layer coating with significantly improved corrosion protection up to class C5-M

- » **Sustainability:** By using the highest quality materials efficiently, we guarantee the longevity of your products as classic reusable packaging.

- » **Environmentally friendly:** Fully recyclable packaging with a smaller environmental footprint thanks to our ongoing investment in modern, energy-efficient manufacturing.

- » **Valve:** EN ISO 15995-compliant with safety device, EC approval and 15 years of use

» **Technical data:**

Tara weight:	8.0 kg (approx.)
Filling weight:	11.4 kg (max.)
Volume:	27.2 l
Test pressure:	30 bar

- » **Customer-oriented:** The products are each powder-coated in a single colour as standard and have screen printing and a safety sticker.

We can also customise your product with additional stickers, barcodes, sleeves, two-layer paint or multi-colour finishes according to individual consultation.

Certification

Gasflaschenwerk Grünhain GmbH is certified in accordance with Directive 2010/35/EU, ADR, RID. Production monitoring and initial testing is carried out in accordance with the above principles by the company's own testing service, which is recognised in accordance with point 1.8.7.6. Certification is carried out by the notified body.

LOGISTICS OUR SERVICE

WE SET STANDARDS - INCLUDING IN LOGISTICS
