

THE LIGHTWEIGHT CONTENDERS

- » **Safe Design:** An unmatched safety record is backed by over 20 million cylinders in use worldwide. BLEVE-free, safer to handle and suitable for weather conditions ranging from -40C to +65C.

- » **Rust-Free:** Composite cylinders do not rust nor stain surfaces. They eliminate the risk of undetected leaks and toxic residues from the energy intensive refurbishment process.

- » **Translucent:** Users can easily see the level of gas and know when it is time to refill, which means they will be less likely to run out of gas, eliminating the need for inaccurate gauges.

- » **Lightweight:** Their lighter weight, approximately half of their steel counterparts, is one of their most user-friendly attributes, allowing a much easier handling.

- | » Technical data: | 5kg | 10kg |
|--------------------------|------------------|------------------|
| Empty weight: | 3.4 kg (approx.) | 5.0 kg (approx.) |
| Propane capacity: | 5 kg | 10 kg |
| Butane capacity: | 6 kg | 12 kg |
| Volume: | 12,5 l | 24,5 l |
